### DETAILED ACTION

1. This Office Action is response to Applicants' Appeal Brief filed on 06/22/2005.

### EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Sean L. Ingram (Reg. No.: 48,283) on 10/28/2005.

Claim 1 is amended as the following:

**A method for enabling a user to refine a search query using a graphical user interface, the method comprising the steps of:**

**presenting a graphical user interface to a user;**

**enabling a user to selectively input search parameters into a first search query using the graphical user interface; , wherein the step of presenting comprising the steps of:**

**receiving the first search query;**

**searching at least one database for objects that satisfy the first search query;**

**determining whether at least one object stored in the database satisfies the first search query;**

**retrieving a first search result comprising the at least one object if a determination is made that the at least one object satisfies the first search query;**

**determining a type of information included in the at least one object associated with the first search result;**

**determining at least one search refinement option based on the type of information determined; and**

**searching the first search result for objects that satisfy a second search query, the second search query comprising the at least one search refinement option.**

3. Claims 1-5, 7-10, 13-16 and 19-22 are allowed.

#### **Allowable Subject Matter**

4. The present application has been thoroughly reviewed. Upon searching a variety of databases, the examiner respectfully submits that claims 1-5, 7-10, 13-16 and 19-22 are allowed in light of the applicants' argument and in light of the prior arts of made record.

5. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a computer-implemented method, a computer system and a processor readable medium for enabling a user to refine a

search query using a graphical user interface. A search of a database is performed according to a search query to produce an initial search result. Based on the relevant of the initial search, the search query may be refined and a refined search may be performed that includes searching only those objects includes in the initial search result. A type of information included in the at least one object associated with the first search result may be determined, searching the first search result for objects that satisfy a second search query, the second search query may be determined by a search refinement option.

The closest prior arts, Bowman et al. of US Patent No.: 6,169,986 (hereinafter Bowman) teaches receiving a search query from a user submitting via GUI, display search result and facilitating the refinement of search queries. Neal et al. of US Patent No.: 6,907,424 (hereinafter Neal) teaches narrowing down the search by using the drop-down menu list to select the type of information to be included in the search result. And Gjerdingen et al. of US Patent No.: 6,539,395 (hereinafter Gjerdingen) teaches using the second search query, which is inputted by a user via GUI in order to refine the search result set from the first search query and the result of the refined search are presented to the user.

Thus, In combination, Bowman and Neal and Gjerdingen fail to teach "searching the first search result for objects that satisfy a second search query, the second search query comprising the at least one search refinement option."

These distinct features, in conjunction with all other limitations of the dependents and independent claims render claims 1-5, 7-10, 13-16 and 19-22 them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
